EDUCATION

National University of Singapore (NUS)

Aug 2021 - May 2025

Bachelor of Computing in Information Systems

WORK EXPERIENCE

Software Engineer, Shopee | Singapore

Jul 2025 - Present

- Implemented and integrated frontend features for teleconsultation flows, connecting with backend services and third-party providers to enable regulatory-compliant pharmaceutical listings contributing to USD 162K medicine GMV YTD 2025.
- Developed and maintained business-facing frontend features, improving user experience and compliance.
- Enhanced web checkout and internal tooling, focusing on performance, reliability, and team efficiency.
- Collaborated with cross-functional teams to deliver features smoothly, using React, Redux, React Router, and Jotai.

Freelance Developer | Remote

Jun 2023 - Jul 2025

- Engaged with prospective clients to define project scope, gather use cases, and align deliverables with business needs.
- Built responsive web pages using Next.js, HTML, CSS, and JavaScript to improve user experience and functionality.
- Developed web crawlers to extract and organize online data into Google Sheets using Python, AWS Lambda, and CloudWatch for streamlined analysis.
- Designed and implemented a Telegram bot to summarize key insights from PDF reports in filtered emails, leveraging Python, Sumy, and Facebook's bart-large-cnn model on HuggingFace.

Software Engineer Intern, Kovalee | Paris, France

Feb 2024 - Jul 2024

- Spearheaded partner dashboard development, integrating Snowflake queries into API endpoints and building the UI with Astro, React, and Tailwind CSS.
- Refactored API endpoints to utilize core library functions and migrated from a monolithic to a microservice architecture.
- Implemented UI and reusable components for multiple tools using React, TypeScript, and Tailwind CSS.
- Delivered urgent hotfixes, including updating deprecated API integrations and resolving production downtime.
- Fixed user-reported bugs, improving system stability and user satisfaction.
- Created onboarding guides and checklists for new developers, streamlining ramp-up time.
- Documented common bugs and solutions, reducing troubleshooting time for engineers.
- Implemented and deployed cron jobs and web services on Render.

Software Engineer Intern, GovTech, | Singapore

May 2022 - Jan 2023

- Led Project Latios, developing trackable URLs with click-through analytics using Python, FastAPI, and DynamoDB.
- Collaborated with 2 engineers to build a personalized newsletter system for multiple government agencies, leveraging AWS, Python, and MongoDB.
- Automated web crawling of 20+ news sites daily using Scrapy, and standardized articles with NLP techniques (lemmatization, tokenization, stopword removal).
- Built REST APIs with FastAPI to integrate DynamoDB data into a custom EDM editor for internal teams.

SKILLS

Languages: Python, Java, SQL, HTML/CSS, TypeScript

Technologies: ReactJS, React Native, Node.js, Express.js, Bootstrap, Tailwind CSS, Astro,

Tools & Platforms: AWS, PostgreSQL, MongoDB, Firebase, Next.js, Streamlit

MISC

- JP Morgan Code For Good 2023 - Finalist
